

VOLVO PENTA EVC SYSTEM

TOW MODE

Optimized for water sport

Get focus on the sport experience

The Tow mode makes tubing, wake boarding and waterskiing easier, safer and more fun! Tow mode automatically accelerates to your pre set engine speed and maintains that speed for maximum water sport fun. . You can now focus on the sport experience.

Water sport software

You know how difficult it can be to maintain speed when turning or in bumpy waters. And if you are the one, doing watersports, wouldn't it be nice to have the same speed all the time? Tow mode is an easily installed software for Volvo Penta gasoline Aquamatic with EVC in single installation. The main benefit of Tow mode is that you can set maximum engine rpm to avoid going too fast.

Easy to operate

With the EVC control panel you pre set maximum engine rpm. When you give full throttle, the engine accelerates at its peak, but does not go above your preset rpm. With changing load, i.e. the skier turns sharply, the system quickly compensates so that the engine keeps pre set rpm. To adjust speed, the driver simply click the buttons on the EVC panel.

EVC Accessories

Smart accessories that make boating simpler and more environmentally friendly. Plug-in installation of instruments, active monitoring and troubleshooting, engine data in the chart plotter and the ability to upgrade the boat's functions at a later date. It's quick and easy to install Volvo Penta EVC Accessories in a boat equipped with Volvo Penta EVC. These are some of the options available with Volvo Penta's electronic platform, EVC

World-class performance

All Volvo Penta EVC Accessories is developed, designed & serviced by Volvo Penta. This means that it's function is perfectly matched with your Volvo Penta engine. Find out more about EVC Accessories on our website.

VOLVO PENTA

Powertrim Assistant Software
– see separate leaflet.

Volvo Penta EVC System

EVC – Electronic Vessel Control – is Volvo Penta's common electronic platform. Based on the same CAN-bus technology used in ships, planes and cars, EVC gives total integration. All information is distributed on one CAN-bus backbone. This radically reduces the amount of wiring and connectors required, leading to much higher reliability and easier installation.

EVC offers improved functionality as standard or option. Features that are impossible with standard systems and give you better safety, comfort and driving economy. Please contact your local Volvo Penta dealer for more information regarding Volvo Penta engines and Volvo Penta EVC system.
